Cleanliness is necessarily at all times conducive to health, and this, as well as economy, is greatly promoted by substituting for the poisonous process of painting with oil and white lead

STEPHENS' DYES for STAINING WOOD, as a SUBSTITUTE for PAINT. For decorating churches, large public rooms, and theatres, as well as private dwellings. When economy is an expenditure of material and time is of importance, these Dyes will be found of the greatest advantage, as they give a rich colour to plain woods, while they reflect all the beauty of the natural grinining, which is so superior to imitations by art, and, at the same time, avoid the disagreeable smell and deleterious consequences of paint. The Dyes, or Stains, are prepared and sold by HENRY STEPHENS, 54, Stamford-street, Blackfriars-road, London, in bottles of 6d. and 1s. each, and at 1os. per gallon. The dark colour may be obtained in powder at 6s. per lb., which dissolves on water to form the liquid, and 1 lb. will make one gallon of stain. N.B. The trade supplied.—Sold also at the Office of "The Builder," 2, York-street, Covent Garden, London; and by HOPKINS and CURVIE, 29, Direct-street, Soho.

The new process ensures the entire removal of moisture, hardens the gums, prevents further shrinkage, and strengthens the fibre.—For scale of prices, or license to work the patent, or any further information, address, post-paid, or apply to W. H. TANQUERAY, Secretary at the temporary offices of the Company, 28, New Broad-street, City.

TIMBER AND DEAL SAWING AND PLANING MILLS,
Belvidere-road, Lambeth, near Waterloo-bridge.

THE GENERAL WOOD-CUTTING COMPANY continue to receive the most satisfactory assurances from all who have given their improved machinery a trial, that there is no method of preparing floor-boards, matched linings, skirtings, &c., by which accuracy, despatch, and economy of material are so certainly obtained. In shooting, or gravite and tonguing a board (although curved), the machine follows the edge, removing no more than the skin of the wood, and by the use of a peculiar saw for deep cutting, the board comes off with a perfect surface, thus obviating the necessity of reducing its thickness in order to plane out the hollows. The Company being neither builders nor timber merchants, unconnected with any trade but that of sawing and planing, and depending solely on the public for a moderate interest on their capital, are determined, by an assiduous attention to the interests of their customers, both as regards workmanship and general business arrangements, to merit a continuance of their support.

A great reduction has also been made in the prices, and they are now much CHEAPER, as well as BETTER, than any others.
